

ALL THE RIGHT ANGLES.

How you affix your tubular sensors to equipment greatly effects their operation and ease of positioning relative to target. Instead of attaching the sensor directly to the machine with a through-hole or slot, (or fabricating your own brackets), let SoftNoze™ supply your needs. With SoftNoze multi-slot brackets, you'll be able to adjust the sensor across three planes of adjustment: side-to-side, in-and-out, and up-and-down. Plus, they have the ability to swivel 10 degrees.

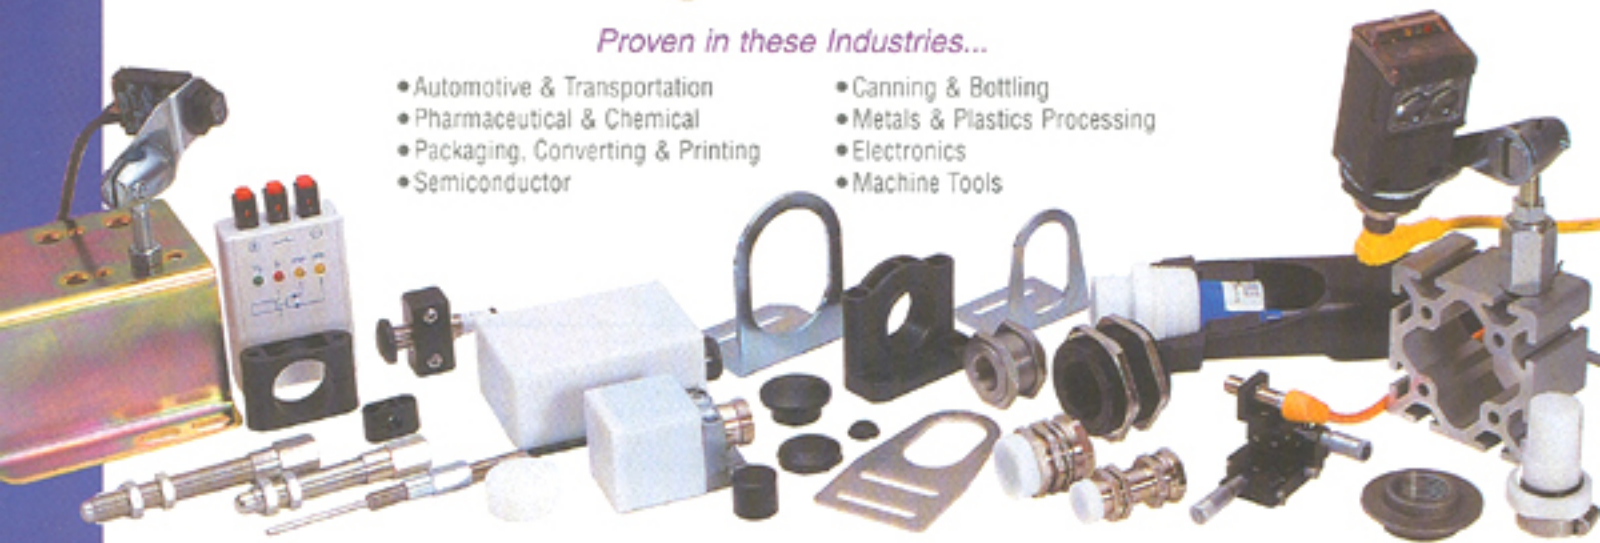

SoftNoze™ RiteAngle™ (Straight and Flat brackets for tubular control devices are engineered in a variety of sizes and materials to fit a wide range of applications. They are easily installed and available in stainless or zinc-plated steel.

Our brackets use a standard footprint, and our selection allows you to choose a bracket that's proportional to your application. And we can produce special designs to meet your extraordinary requirements. Need help? Give us a call or visit our Web site for more information.

Proven in these Industries...

- Automotive & Transportation
- Pharmaceutical & Chemical
- Packaging, Converting & Printing
- Semiconductor
- Canning & Bottling
- Metals & Plastics Processing
- Electronics
- Machine Tools

SoftNoze™- Brackets-R-US

Why spend valuable time and energy producing your own brackets when SoftNoze can supply brackets to meet your every need for less? Choose the best bracket for the job or have us produce and stock one to your design requirements.

SoftNoze brackets give you the right angle... every time.
